

The River

A river takes a long and winding path on its way to the ocean. It begins as a humble trickle high in the mountains, and flows through a plethora of landscapes as it grows bigger. Here we witness this journey from the point of view of five little pinecones, who ride the current to find new homes. Along the way, they encounter a woody stream, a rushing waterfall, a marshy fork and a big-city delta. One by one, they choose to stop and stay in a particular spot, leaving the rest to continue the trip. Finally, one lone pinecone drifts out to sea, and washes up on another shore, where he begins to sprout. Perfect for introducing young children to ecology and geography, this book brings an original point of view to a little-studied subject.
