

## Alchemy: How Adolescence Changes Children into Adults

Adolescence, like alchemy, is an almost magical process that transforms children into adults. It is a personal passage through time, a difficult and demanding journey of exploration, at times stormy, at times dull. Adolescence is the bridge, the alchemic change that makes the journey from childhood to adulthood happen. The voyage makes adolescence what it is, the possibility of a transmutation of the base metal of childhood into adulthood golden with opportunity. And teens searching for autonomy make claims on adult privilege that perplex and challenge parents. Dr. Harris Faigel writes about the incredibly diverse dimensions of adolescent development and change, including concerns about teens bodies, minds, the worlds in which they live, sex and sexuality, health, delinquency, schools, family relationships. This is an invaluable resource for parents as they seek to understand the behavior, motivations, and growth of their adolescent children.
