

How We Use Plastic (Raintree Perspectives: Using Materials)

Designed for young independent readers of between 6 and 8, Perspectives combines core non-fiction features with an emphasis on research skills with visual design. Using Materials focuses on the uses of a wide range of different materials, their applications, properties and why certain materials are selected for particular roles. Images help pupils to see these materials uses, from the everyday to the unusual. The books explain where the materials come from and whether they are natural or man-made. They promote discussion regarding the sustainability of materials and the environmental impact.
