

Buy Low, Sell High: a proven, time-honored strategy

My close friend has similar income as I. When we retired (I retired at least 10 years earlier), I had about four times his total equity. The main reason is I followed this time-honored Buy Low, Sell High strategy.

Before 2000, market timing is a waste of time. Since then, it is critical to your financial health. The average loss of the last two market crash is about 45%. My simple technique described in this book does not require any charting or any subscription/tool. It does not detect the peaks and bottoms but it would have saved you a lot of money in exiting and reentering the market. Most likely it will detect the next crash. As in life, nothing is guaranteed. The book shows you to find value and evaluate stocks in term of the fundamental metrics not in term of low prices. Value stocks needs time (at least 6 months) for the market to realize its value. Do not marry with a stock. When the fundamentals change or your objective has been fulfilled, you need to sell it. Last Update: 01/2016 Size: 90 pages (6*9)
