

Motion Gr. 5-8

Take the mystery out of motion. Our resource gives you everything you need to teach young scientists about motion. Students will learn about linear, accelerating, rotating and oscillating motion, and how these relate to everyday life and even the solar system. Measuring and graphing motion is easy, and the concepts of speed, velocity and acceleration are clearly explained. Reading passages, comprehension questions, color mini posters and lots of hands-on activities all help teach and reinforce key concepts. Vocabulary and language are simplified in our resource to make them accessible to struggling readers. Crossword, Word Search and Comprehension Quiz also included. All of our content meets the Common Core State Standards and are written to Blooms Taxonomy and STEM initiatives.
