

The Coal Mining Industry of Barnsley, Rotherham and Nottingham

The culmination of some 40 years of research sees Ken Wain tell the story of the mining industry in this part of South Yorkshire. He tells of the life stories of the many collieries, from Barnsley to Mansfield. From the large towns to small villages built around their local pit, Ken gives an insight into the growth of coal and ironstone mining in the area, as well as some of the human stories of disaster and of working and living conditions for the miners and their families. He covers the period from the mediaeval times to the bitter miners strike of 1984/85 and the aftermath of this damaging strike, which effectively killed Britain's deep mining industry.
