

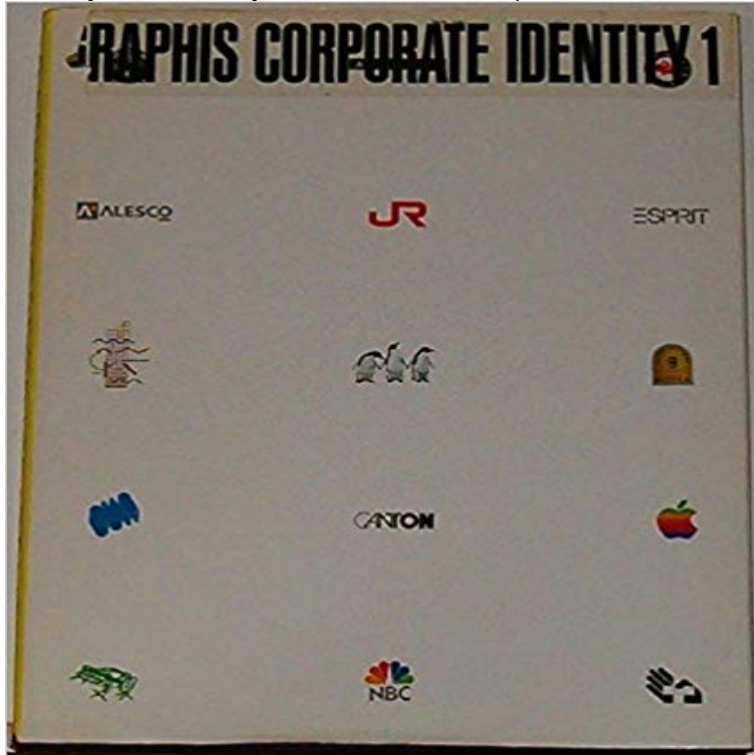

Graphis Corporate Identity 1: Visual Corporate Identities

Graphis Corporate Identity 1 is devoted to the visible element of C.I. Programs. This includes logos and symbols, product and packaging design, vehicle livery, external identification, uniforms, buildings, interior design, product catalogs, information brochures, and promotional articles. 45 enterprises from all over the world are represented. Among them are Apple Computer, BMW, Esprit, NASA, the Rockefeller Center, and the Art Center--as well as corporations less known on an international scale, such as IPSA (cosmetic). Bonza Tucker (restaurant chain), and the Japan Railway. Every corporate design feature illustrated is accompanied by the clients and the design firms comments, so that the reader is informed about its background, aims and methods. C.I. design expert Saul Bass discusses the subject in the introduction, and his no less famous colleague Eugene J. Grossman offers a comprehensive and illustrated contribution on the design of Standards Manuals. Graphis Corporate Identity 1 is motivating, inspiring, and informative and last but not least--a visual delight.
