

How to Master Baseball

Over the years, I have not been content to merely theorize or guess about how baseball could be improved. I had to become an instructor, inventor, photographer, author and more. After 40 years of research and experience, I now feel confident about what I have to say. With each invention, I changed my theories into facts. I invented 19 baseball apparatuses for hitting, throwing, infield, outfield, base sliding, Fast Pitch and Slow Pitch. Two of these have patents, one for hitting and the other for base sliding. I designed 27 batting tees; 6 various home bases; a pitchers plate; 8 sets of unique bases; plus a backstop and batting cage. This is a total of more than 60 baseball devices. They can be made at home with a plastic pipe cutter or hack saw, pliers, tape measure, screwdriver, and PVC glue. More important, you can practice by yourself and achieve total improvement. The instructions on how to use these inventions are included. WITH THESE METHODS AND INVENTIONS, A BATTER CAN ELIMINATE STRIKING OUT. This is an uncompromising and educational baseball instructional book, utilizing a step-by-step, self-taught technique of questions and answers. Q: How does the batter have Full Plate Coverage? Can you explain and prove it with a device or invention? Q: How can the batter hit the curve ball? Can you explain and prove it with a device or invention? Q: Why do I hit pop-fly balls or foul balls all the time? Can you explain and prove it? Q: In hitting Fast Pitch or Slow Pitch, at what point should the batter swing the bat to hit inside, middle, and outside pitched balls? Can you explain and prove it? Find the answers to the above, and a lot more, within the pages of this book. FROM THE WHEEL TO THE SPACE SATELLITE, INVENTORS HAVE RECEIVED RECOGNITION FOR THEIR CONTRIBUTION TO PROGRESS. THEREFORE, LET THIS

INVENTOR TEACH YOU PLAYER,
COACH OR SPECTATOR THE ART
AND SCIENCE OF AMERICAN
BASEBALL.
