

Advanced Computational Methods in Science and Engineering (Lecture Notes in Computational Science and Engineering)

The aim of the present book is to show, in a broad and yet deep way, the state of the art in computational science and engineering. Examples of topics addressed are: fast and accurate numerical algorithms, model-order reduction, grid computing, immersed-boundary methods, and specific computational methods for simulating a wide variety of challenging problems, problems such as: fluid-structure interaction, turbulent flames, bone-fracture healing, micro-electro-mechanical systems, failure of composite materials, storm surges, particulate flows, and so on. The main benefit offered to readers of the book is a well-balanced, up-to-date overview over the field of computational science and engineering, through in-depth articles by specialists from the separate disciplines.

Advanced Computing Lecture Notes In Computational Science And Advanced computational methods in science and engineering / Barry Koren, Berlin Springer - Lecture notes in computational science and engineering -- 71.

Advanced Computational Methods in Science and Engineering - Google Books Result Computational science and engineering (CSE) is a rapidly growing CSE makes use of the techniques of applied mathematics and computer science for the development A major advance in computing power will enable scientists to incorporate . We note that in many institutions there is much redundancy and overlap

Lecture Notes in Computational Science and Engineering - Springer The main benefit offered to readers of the book is a well-balanced, up-to-date overview over the field of computational science and engineering, through **Numerical Methods for Computational Science and Engineering** Barry Koren and Kees Vuik (eds.), Advanced Computational Methods in Science and Engineering, Lecture Notes in Computational Science and Engineering, **Lecture Notes in Computational Science and Engineering - Springer** B.
