

Bounds on Scattering Phase Shifts for Compound Systems (Classic Reprint)

Excerpt from Bounds on Scattering Phase Shifts for Compound Systems
Bounds on Scattering Phase Shifts for Compound Systems was written by Leonard Rosenberg and Larry Spruch in 1960. This is a 34 page book, containing 6757 words. Search Inside is enabled for this title. About the Publisher
Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com
This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
