

Investing Sites for Profit

This book is targeted to beginner investors and/or couch potatoes who do not want to spend a lot of time in managing their investments. It is similar to my other book Investing for Beginners. However, it emphasizes on investing sites and how to make full use of it. My basic steps in investing: 1. Time the market. When the market is risky, do not buy and hold stocks unless they are value stocks. This book has a simple technique to exit the market and reenter the market without charting. 2. Rotate sector ETFs. For simplicity, rotate an ETF that stimulates the market such as SPY and cash. Most should rotate four ETFs as described in this book. 3. If you have more time for research, buy value stocks via screening and then evaluating. 4. Sell the stocks you owned when the market is risky (step #1) and/or the stocks fundamentals deteriorate. 5. Monitor your screeners and scoring system. This book helps someone looking for simple but profitable strategies in investing. It only takes about half an hour a month to monitor the market and decide what stocks to buy and sell. For those who do not want to spend time in researching stocks, just trade ETFs. This book uses the advanced strategies described in my other books but in very simplified instructions. The trick is to make them easy to use from the research information available to us free of charge. I start with The Power of Market Timing to indicate its importance. You time the market and trade ETFs to reap the profit. The second article Beat S&P500 by 100% describes how and why fundamental analysis works. For starters, just trade ETFs and you can skip the latter chapters in evaluating stocks. In the simplest terms, I discussed how to evaluate stocks fundamentally and technically. Use the research available in the free sites such as Finviz.com. Instead of spending hours in researching one stock, you can do the same in a few minutes as others have researched
