

Micro Cap Stocks

I enjoy micro caps (stocks between 50M to 300M according to SEC) more than penny stocks as they're less risky. When they're listed in one of the three major exchanges, we have all the required filings of these companies. We can use the same tools to track most other stocks. However, you may have a hard time to find articles on these stocks. The potential of these stocks moving up to mid cap and even large cap could mean huge appreciation. Eventually and hopefully they will be included in one of the major lists such as the S&P 500 and this would boost up the stock prices automatically as some ETFs are required to buy them.
