

Light, Gravity, Magnetism, and Dots

This book discusses light, gravity, magnetism, black holes, space travel, time travel, anti-gravity and more in a practical way and brings in a new theory to explain them. It is meant for all that want to know more about the world around us. The book is without any formulas to help the reader understand the concepts discussed without losing them in the math. It is the new theory that bridges the gaps in the understandings of Physics and Chemistry. A missing component necessary to bring it all together. This is a short book meant to get to the point without the extra fill of a text book.
