

Instant Orgasm: Excitement at First Touch (Positively Sexual)

In their latest book, noted sexperts Steve and Vera Bodansky show readers how to take their sexual pleasure to the max by becoming instantly orgasmic. In the first part of the book, they describe the concept of instant orgasm and explain why humankind's natural ability to experience ecstasy has been stifled through cultural brainwashing. They then present specific techniques for becoming instantly orgasmic by using a Ground Hog approach: starting and stopping over and over again, each time with additional knowledge gained until the concept is totally integrated into actual sensation and feelings. A chapter on pleasurable peaking describes the technique in more detail than ever before, with added emphasis on each peak starting with a first stroke mentality. The authors also delve into the reasons why some people resist pleasure and offer ways to handle those resistances, allowing anyone to become a fully sensual being.
