

Shale Gas Development: Meeting Transportation, Pipeline, and Rail Needs to Renew American Manufacturing

Were holding this hearing in the heart of a region experiencing tremendous opportunity as a result of shale gas development. Through the Commerce Committee, I'd like to look at the infrastructure needs we must meet to mobilize a rebirth of West Virginia manufacturing. Every aspect of shale development presents us with both challenges and opportunities. Whether highway issues or pipeline safety, if West Virginia gets it right up front if we find and follow best practices, meet developers needs and address community concerns future success knows no bounds.
