

Resources Energy and Development (People and Their Environment Ser)

Part of a series for GCSE and Standard Grade which reflects the current emphasis in geography courses upon the interaction of people and the environment, this textbook examines forestry, fishing and mining, water, sources of energy and primary products from the developing world. There are question panels on each double-page spread and extensive assessments at the end of each unit. Photo-copiable pupil profile sheets are another feature. The book offers a wide range of geographical content from the UK and abroad, with detailed examples and case studies from developed and developing countries at local, national and regional levels.
