

National Geographic Readers: Wolves

They run in packs, stalk their prey, and howl at the moon. And no matter where you are--they're always lurking somewhere nearby. Wolves, the predatory puppy dogs of the wild, are feared and loved by people everywhere. But are they misunderstood? In this fascinating level 2 reader, you'll learn that there's much more to being a wolf than most people could ever believe. Did you know that each pack has a pecking order? That wolves can talk to each other using body language? Or that they're actually not out to attack humans, they usually leave people well enough alone? Full of incredible photographs and interesting information, NGR Wolves will appeal to all kids.
