

Prespacetime Journal Volume 4 Issue 4: Math Physics, Modified GR Solutions & Explorations of Natural Constants

Prespacetime Journal (PSTJ, <http://www.prespacetime.com>) is a publication in which physicists, mathematicians and other learned scholars publish their research results and express their views on the origin, nature and mechanism of spacetime and its possible connection to a prespacetime. It is also a journal where all learned scholars can present their models and experimental results on elemental particles, fundamental forces including gravity and related topics. This is PSTJ Volume 4 Issue 4 first published in April 2013. It is entitled Math Physics, Modified GR Solutions & Explorations of Natural Constants and contains following articles: (1) New Approach for Binormal Spherical Image in Terms of Inextensible Flow in E3; (2) Borel Resummation & the Solution of Integral Equations; (3) Bianchi Type-IX Dark Energy Model in Brans-Dicke Theory of Gravitation; (4) Dark Energy Cosmological Model in General Scalar Tensor Theory of Gravitation; (5) Bianchi Type-VI0 String Cosmological Models in a New Scalar-Tensor Theory of Gravitation; (6) Axially Symmetric Domain Walls & Cosmic Strings in Modified Theory of Gravitation; (7) Brief Report on Modeling Neutrinos; (8) Alpha & Omega in the Algebraic Model of the Unified World; (9) Derivation of Natural Constants with a New Formula: Part I, II, III & IV; (10) Time Reborn by Lee Smolin; and (11) UK Open Access Policy Launches.
