Although it may seem like everyone has a website these days, this is not 100 percent true. Small companies with and without websites struggle with 2 main design issues: What should be on my website and how do I organize and build a website that will be effective for my business? This book provides answers to these questions and specifically addresses the fact that although a website is not for every company, it can be a cost-effective tool for small companies who do not have a big marketing budget or large distribution networks.
