

Charisma is something that we know when we see it. When a charismatic person walks into a room, everybody knows it. It's that one quality that makes us attracted to this person. To want to be with this person. To listen to everything this person says. Luckily, charisma is not genetic or random. It is based on scientific interpersonal principles that you can learn, and you can exhibit. Communication skills, reading and projecting body language, and the inner ideas and beliefs you carry around with you will determine the energy you project. In this easy to understand guide, you'll learn what charisma is, and how to cultivate it. In a series of short essays with practice exercises, you will slowly change your personality into a magnetically attractive, highly charismatic person that will attract more friends, more lovers, and more money.
