

Soil: Lets Look at a Garden (Read & Learn: Material Detectives)

Read and Learn is our extensive collection that helps young readers discover and understand the world around them. These books are packed full of fascinating facts and intriguing, labelled photographs that will really grab their attention. Using questions to focus learning, each title will prompt discussion, encourage information gathering and truly involve children in the topics they are studying. Material Detectives: Encourages children to investigate an object using all of their senses. Each book takes a familiar item made from a single material and explores the different properties and uses of that material. A quiz at the end of each title tests comprehension and encourages research skills.
