

# Project Management Handbook for Building Services (Application Guides)

Written for individual engineers who are responsible for managing their own activities and engineers in an overall management role who have responsibility for managing the activities of others, this title describes both established project management techniques and techniques tailored to the specific situations confronted by building services engineer. It aims to provide practical guidance on the planning and management of building services design; planning and management of building services installation; and the integration of building services design and installation within an overall construction project management framework. Sections include plan of work, design team appointment, inception to outline proposals, outline proposals to detailed design, tender process, construction, commissioning, and handover. In addition the book also contains a toolbox of techniques and appendices supplying additional information.
