

Christmas Tree Space Sails. Volume 15.

This Volume 15 of the series provides a whimsically advanced treatment of conical space sails referred to as Christmas Tree Sails. Both monolithic and grid-type sails are considered. Presented herein is a delightful mathematical tour of novel light-sail concepts along with many additional modes of propulsion included in a single vessel. Persons enjoying numerical methods will appreciate the algorithmic formulas for computing gamma in the context of the relativistic rocket equation modified to yield gamma values. Those wishing to explore a fundamentally new theoretical system of space travel will enjoy this series of books.
