****FORMATTED FOR FULL PAGE COLOR PICTURES INCLUDING KINDLE FIRE SERIES**** Kids Book: Frog on a Log - rhyming counting books for children is a must have for kids who love numbers and finding things. If you love picture books for kids then you will love our full color, full page pictures. Learning to count is one of the basic foundations of math and childrens books usually dont include the layering effect that his book does. More than just a counting book, each page adds visual items for your child to find then in the latter half of the book, takes them away again in reverse order, helping the beginning of subtraction but in a visual way that young children can grasp. If your child loves to find hidden objects then this book is for you. Using the numbers 1 - 10, Frog on a log is a kids counting book that will not only teach your child to count, but the concepts of addition and subtraction, long before they can understand the actual processing of numbers. Visually appealing with bold colors, the illustrations add new things each page. In rhyming verse, our poor little frog who is sitting quietly in his pond, gets more than he bargains for. If you watch closely, his emotions change slightly with each page as he becomes more and more frustrated, that is, until things start disappearing! Frog on a Log is one of many rhyming childrens books that Diana F Acheson has written. If you are looking specifically for rhyming picture books for children, then this book will also teach your child colors, numbers and matching concepts. Repetition is also a feature of the text which has been shown to be really important for young children in learning language and sequencing. Delightful enough for very young children 2-4 or also fun for older children to find objects that are hidden all over the page, this one of many counting childrens books will have your child coming back time after time.
