

Oil Rig Training Bohemian Style: Learning the basics of what the hazards are and potential solutions for the rig manager (Sami the Safety Sumo Supervisor Book 1)

Land based oil rigs operating in the US had 75 companies fined between \$750 and \$75,000 per violation for fatalities that occurred during 2009 to 2011. This manual addresses what those hazards were that resulted in fatalities and what options the manager had to control them. The book utilizes 37 years of safety professionalism to general industry, construction, and the petroleum industry to show the tool-pusher/rig manager where the most likely injuries or fatalities have occurred in the past 5 years & methods of dealing with them.
