

## Pemphigus: The Positive Pig

Pemphigus positive attitude is severely tested when all of his farm animal friends fail to come to his aid after he narrowly escaped two menacing rottweilers called Blood and X-ray. Trapped in a snarl of barb wire with his sensitive pink skin left to the mercy of the burning sun, Pemphigus cries for help. A cancer survivor, author A.D. Smith dedicates this story to the wonderful doctors and nurses of the 6th floor of (UWMC) University of Washington Center and the (SCCA) Seattle Cancer Care Alliance. Over 38 names of nurses and doctors were used in this story.
