

SEO Part 2

I know your time is valuable, so I'm just going to give you a quick description of this incredible ebook...Includes everything related to search engine strategy from a Google point of view. Here's just a small sample of things you'll discover in this report... Why it's important to shoot for the number one search engine results position but not critical that you land there. The two things your website absolutely needs to accomplish once you've targeted a specific keyword. How to design your pages for both viewers and search engine spiders - without sacrificing the quality of your content. The type of pages you should never build - unless you're actually trying to keep from getting listed with the major search engines. Things you should be doing in order to guarantee that all your pages can be crawled and are search engine friendly. What you can do to quickly and easily steal a higher results position away from your competitor. How to get your hands on valuable free tools that can help you get better search engine results (few webmasters bother to take advantage of them).
