

# The Theory of Particle Matter Frequencies and Multiple Universes

For those seeking answers to the questions man has been asking since the beginning of time! Is there more beyond the canvas that we all see? Is time, space, motion, natural law, quantum mechanics and natural branching all related to an expanding analytical data membrane we describe as the big soup or grand scheme. Do we really understand the multiple facets of energy forms that exist? Albert Einstein once conceded by saying God has a sense of humour regarding the other! Quotation: If the spirit of your imagination is limited, your journey of discovery will be very short. ~ Alastair R Agutter Stephen Hawking has concluded that the Big Bang derived from Energy but there has to be another. For without it, an event or execution cannot take place!

According to string theory, absolutely everything in the universe all of the particles that make up matter and forces is comprised of tiny vibrating fundamental strings. **The Theory of Particle Matter Frequencies and Multiple Universes** String theory also explains how subatomic particles can demonstrate both the other universes are vibrating out of phase with ours, at a frequency that we This dark matter and dark energy may be manifestation of the parallel universes. **String Theory and Theory of Entanglement Quantum Energy** Editorial Reviews.
