

Tigers: Deadly Predators of the Jungle (includes 20+ magnificent photos!) (The Great Book of Animal Knowledge 5)

This is a book about tigers. Tigers, as we all know, belong to the family of cats. Do tigers just look like cats or do they behave like them? Many of us are familiar with a cartoon character called Tigger. Tigger is a tiger. A friendly, jolly, bouncing tiger. Is Tigger the typical tiger? Does Tigger reveal what a tiger is really like? This book gives us much information about the tiger. Yes, they are cats. They are big cats. They are cats with sharp claws and paws. But, unlike Tigger, they are fierce. You might have been asking questions about the tiger. Questions like: What does a tiger eat? How do they get their food? In what county can we find them? How do they behave when they are with other tigers? Are they friendly? There are many interesting things about the tiger that this book will tell us about. Read this book and you will find out about the different types of tigers in different parts of the world. You will also discover what an ambush is. And not only that, this book gives us information on baby tigers and how their mothers take care of them. This book is also filled with colorful pictures that will help children create an image in their mind that will help them learn more about the tiger.
