

Corrosion: Industrial Problems, Treatment, and Control Techniques : Proceedings of the 1st Arabian Conference on Corrosion, Kuwait, 1984 (Kfas Proceedings Series, V. 2)

Provides a comprehensive and thorough review of modern techniques for detection, assessment and control of corrosion. The subject-matter includes extensive discussions of corrosion in the oil and gas industries, water supply systems and desalination plants, chemical and petrochemical plants, buildings and concrete structures. This collection of papers by internationally recognized authors is of particular relevance to the work of engineers in the Middle East. Contains 53 papers.
