

# Super Principia Mathematica The Rage to Master Conceptual & Mathematica Physics - The General Theory of Relativity

The Super Principia Mathematica - The Rage to Master Conceptual & Mathematical Physics - The General Theory of Relativity describes Matter and Motion in the Vacuum of Spacetime as being permeated by a Cosmic Vacuum Dark Force. Using Classical and Modern physics a Cosmic Vacuum Dark Force and a Unified Gravitational Vortex Theory, emerges which describes and predicts: The Geometry of Matter & the Vacuum of Spacetime Mechanics Spacetime Mass & the Higgs Field Force String Theory & the Linear Mass Density Equations Spacetime Cosmic Vacuum Dark Force of the Universe Spacetime Vortex Equations Einsteins Cosmological Constant Explained as an Inverse Square Law Universal Free Fall Accretion Acceleration of Matter Einsteins Stress Energy Tensor explained using Classical Mechanics Aether Gravitation - Matter & Heat Radiation Equations Spacetime Expansion & Acceleration Continuum Mechanics Relativistic Mass Energy Equivalence and the Cosmic Dark Force Schwarzschild Radius Black Hole Mechanics Unified Gravitational Vortex Field Theory Schwarzschild Radius Black Hole Mechanics Among other physics concepts involving the General Theory of Relativity The Super Principia Mathematica presents physics and mathematics in the form of simple math models, pictures, definitions, and aphorisms; where anyone with an understanding of algebra and basic calculus can work out the equations laid out in each chapter, that will help to explain the mysteries of the workings of the Universe.
