

I AM, God is light: by which we know that there is no conflict between Creation and the fossil records

Does God exist? Are the words, In the beginning God created the heavens and the earth, true? If God is real and the Bible states that He created the universe in six days, then how do you explain the earth being 4.5 billion years old or the presence of fossils showing evidence of life on earth as far back as 500 million years ago? The key to deciphering this puzzle lies in the words, God is light. By examining the scientific properties of light, we arrive at Gods time, His Omnipotence, and His Everlasting Eternal nature. We see that He is as real today as He was yesterday. Science illustrates how He can be God the Father and God the Son, yet One. There is no conflict between science and faith, only in our current understanding of each. Faith can be used to illustrate or even to help in scientific discoveries. Science can be used to understand many aspects of faith. Furthermore, the signs of His Existence are all around us. Even today, he speaks to us. Every time you see the rainbow, you see a declaration of Gods love for mankind. You see a depiction of the glory of the Lord. What He dictated in the Bible is testified of in nature, as irrefutable evidence of His Existence. The timing of scientific discoveries and the writings of the Bible, and the dispersing of gold nuggets throughout the Bible, declare the veracity of the Bible. There is One Grand Author of the Bible and He is the Maker of the universe.
