

Writing Successful Federal Grant Proposals (Grant Writing Series Book 3)

How do we write a successful grant proposal? No matter what your skill level is when writing grants or whether you are writing grant proposals to submit to federal agencies or private foundations, four rules remain essential to writing a successful grant proposal: research, read, plan, and communicate. These four general rules were described in my first introductory grant writing manual, *Grant Writing Manual: A Project Planning, Grant Seeking, Grant Writing, and Program Management Training Manual*. Before you begin writing your grant proposal, there are a few additional general rules and primary suggestions to follow in order to improve the chances of having your grant request successfully funded. These were also listed in my second grant writing manual, *Advanced Grant Writing Manual: How to Write a Successful Grant Proposal*. In summary you will likely always hear and read that A well-formed grant proposal is one that is carefully prepared, thoughtfully planned, and concisely packaged. In addition to those four rules, additional reasons why grant requests are often funded as well as why they are often denied are included in this manual of the authors Grant Writing Series. As described in the first two books in this series, this manual outlines the key steps to writing successful federal grant proposals, including the program management aspect of having a successfully funded project. This manual builds upon the first two manuals in the authors series and is advanced to the more recent terminology and requirements specific to federal grant requests for proposals from federal funding agencies, guiding the learning how to submit the subsequent grant applications to those agencies to meet the legal requirements in order to receive federal funding.
